MARKET REVIEW

Sugar prices during the month of July were quite stable and deliveries of sugar totaling 974,000 tons would appear to have been about in line with consumption. No further reduction in users' stocks during the month is indicated.

Wholesale refined sugar prices were unchanged during the month of July in all territories except the Southeast and Gulf. On July 10, the quoted price was reduced by 0.25 cent in both territories to 9.10 cents per pound and on July 29, there was a further reduction of 0.15 cent in the Southeast. As of August 4, there had been no further price announcements and the following quotations were in effect.

	Cane	Beet
	Cents per pound in 100 lb. paper bags	
Northeast	9.95	
New York Metropolitan area	9.85	
Southeast	8.95	
Gulf	9.10	
Eastern beet		8.85
Chicago-West	9.05*	8.85*
Lower Pacific Coast	9.30	9.30
Northwest Intermountain	9.10	9.10

*Increases to 9.35 for cane and 9.15 for beet were announced to be effective June 8, but sellers have continued to take day-to-day orders at prices shown.

The spot price for raw sugar delivered to New York, duty paid, was 6.30 cents per pound at the beginning of July and 6.20 at month-end and averaged 6.25 cents. During the first seven months of this year this price averaged 7.35 cents or, on a comparable basis, 1.07 cents less than the price of raw sugar to other countries.

The spot price for sugar to other countries under the Number 8 (world) contract was at 5.26 cents at the beginning of July but was down to 4.50 at the end of the month. The average price for the month of July was 4.80 cents and for January-July 1964 was 7.50 cents per pound.

Total deliveries of sugar for U.S. consumption during January-July 1964 totaled 5,309,000 tons. In addition to these reported deliveries during 1964 there were additional physical deliveries of about 185,000 tons of sugar reported as constructive deliveries during 1963 and an estimated 50,000 tons of sugar that had been delivered by transfer of ownership of sugar in public warehouse rather than by physical delivery to users' facilities. Total physical deliveries of sugar during January-July 1964 would total about 5,544,000 tons. If the current rate of sugar usage approximates 9.8 million tons annually (the present requirements determination), it would appear that invisible stocks, those held by industrial users, wholesalers and retailers, at the end of July 1964 were about 100,000 tons less than at the beginning of the year or about at the level of those at the beginning of 1963. Invisible stocks at that time were estimated to have been about 100,000 tons higher than normal because of the buildup during December 1962 in anticipation of the water-front strike.

Stocks held by primary distributors at the end of July 1964 totaled 1,496,000 tons, slightly less than those of July 31 last year. Stocks held by beet sugar processors were up 55,000 tons while refiners' stocks were 74,000 tons down from the high level of last year, 782,000 tons on July 31, 1964, as compared with 856,000 tons on July 31, 1963. Refiners' stocks on July 31 for the previous five years (1958-62) averaged 679,000 tons.

Beet sugar deliveries during January-July 1964 totaled 1,485,000 tons or 69.6 percent of the effective inventory at the beginning of the year. As shown in the following table, this is 1.2 percentage points below the average for the previous five years and lower than any of those years. This would indicate that the January-September 1964 deliveries would be less than average percentage for the previous five years even if the average percentage of deliveries were made during August and September.

Calendar year	January 1 effective inventory: 1,000 short tons, raw value	January-July deliveries: 1,000 short tons, raw value	January-July deliveries: As a percentage of effective inventory	August-September deliveries: 1,000 short tons, raw value	August-September deliveries: As a percentage of effective inventory	January-September deliveries: 1,000 short tons, raw value	January-September deliveries: As a percentage of effective inventory

ADMINISTRATIVE ACTIONS

Date announced	Nature of action
July 10, 1964	General provisions pertaining to conditional payments, heretofore appearing in the proportionate share determinations for Mainland Cane Sugar Area. In addition, this action incorporates into the regulations the child labor provisions of the Sugar Act. (See July 10, 1964 Federal Register).
July 30, 1964	A parish and local producing areas in Louisiana and Florida designated as eligible for abandonment and crop deficiency payments on 1963-crop sugarcane. (See July 30, 1964 Federal Register).

STATISTICAL SERIES IN THIS ISSUE

HIGHLIGHTS

1. July 1964 sugar deliveries for continental U.S. consumption 974,000 short tons, raw value (preliminary), up about 56,000 tons from June 1964, and up 175,000 tons from July 1963. January-July 1964 deliveries 5,309,000 short tons, raw value, down about 249,000 tons from January-July 1963. Final data for June 1964 deliveries 918,000 short tons, raw value.

2. Primary distributors' stocks August 1, 1964 were 1,495,557 short tons, raw value (preliminary), down 9,000 tons from a year ago, and down 370,000 tons from end June 1964. During July refiners' stocks decreased by 121,000 tons, beet processors' stocks by 226,000 tons, and mainland cane processors' stocks by 28,000 tons; importers of direct consumption sugar stocks increased by about 5,000 tons.

3. Charges to 1964 quotas through July 31, 1964 were 5,789,604 short tons, raw value, leaving a balance of 4,011,060 tons to be supplied within the 9,800,000 ton total.

4. Regionally, January-June deliveries, 1964 as compared with 1963 were down to all 5 regions: North Central 12.4 percent, West 8.7 percent, South 7.6 percent, Middle Atlantic 6.7 percent and New England 6.4 percent.

1/ Spot prices during 1959-60 were for sugar in bags under Contract No. 6 plus .50 cent per pound duty (Cuban). Beginning with 1961, spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free.

2/ Spot prices during 1959-60 based on No. 4 Contract which was for bagged sugar f.a.s. Cuba. Beginning with 1961 spot prices are those under No. 8 Contract which is also for bagged sugar but f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ For 1959-60 these amounts are the difference between the spot prices of the No. 6 "Domestic" Contract rolled back to Cuba (minus freight and insurance) and the spot prices of the No. 4 "World" Contract. Beginning with 1961 the No. 7 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢) computed freight from Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports No. 81, January 1959, pages 5 to 9.

1/ Gross basis price in 100 pound bags subject to a 2 percent cash discount.
2/ Hydrate, in 100 pound bags.
3/ In drums, price in carload lots, except beginning February 1962 for less than carload lots. Quoted as 42 percent unmixed, except beginning March 1956, quoted as 43 percent unmixed.
4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus, dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.
